

Amendments to the Specification

At page 11, please rewrite the paragraph extending from lines 17-26 as follows:

Application Serial No. 08/948,833, filed October 10, 1997 and issued on
February 16, 1999 as U.S. Patent No. 5,872,836 (the '836 patent), includes at
pages 33-221 a program listing, which is hereby incorporated by reference in its
entirety. The program listing ~~presented at the conclusion of this specification~~
provides numerous functions which allow the combination of the host computer and
the interface card to support a rich assortment of voice and data communications
applications. The listed source programs are written in convention assembly
language and may be assembled, linked and executed on any IBM-compatible
Personal Computer which has sufficient operating speed and which is equipped
with the expansion card described above. The assembly language which defines
the program and data structures needed to implement the illustrative embodiment
is divided into 12 separately listed modules which are summarized below and
depicted in Fig. 4 of the drawings:

At page 32, please rewrite the paragraph extending from lines 15-19 as follows:

It is to be understood that the arrangement which has been
described, and which is implemented by the programs listed ~~below~~ in the
'836 patent, is merely illustrative of one application of the principles
of the invention. Numerous modifications may be made by those skilled
in the art without departing from the true spirit and scope of the
invention.
